Key Concepts: Legend Editor (Symbol Appearance in the View's Table of Contents)

The diagram illustrates three states of the Legend Editor dialog box, connected by arrows to show a sequence of actions:

- Initial State (Top Left):** The 'Classification Field' is 'Pop90'. The 'Legend Type' is 'Graduated Color'. The 'Color Ramps' dropdown is set to 'Yellow monochromatic'. The table shows five rows of data.
- Re-sorting Labels (Top Right):** An arrow points to the 'Sort' button (a small icon with a vertical line and arrows) in the bottom toolbar. A text box explains: "This re-sorts the labels from highest to lowest".
- Editing a Symbol (Bottom Right):** An arrow points to the first row of the table (Symbol: 0 - 9931). A text box explains: "By clicking on a Symbol row, it is highlighted, and can be edited (deleted, color changed, symbol filled changed, etc.)".

Below the initial state, a text box explains: "By using the symbols at the bottom of the Legend Editor, you can change how the labels will appear in the View's Table of Contents."

The table in the Legend Editor contains the following data:

Symbol	Value	Label
0 - 9931	0 - 9931	0 - 9931
9932 - 26777	9932 - 26777	9932 - 26777
26778 - 64989	26778 - 64989	26778 - 64989
64990 - 169759	64990 - 169759	64990 - 169759
169760 - 574283	169760 - 574283	169760 - 574283
